Profile

A highly motivated graduate student specializing in software engineering, proficient in JavaScript and the MERN stack. My primary objective is to cultivate my skills further and showcase my exceptional problem-solving abilities while actively participating in practical assignments and project development.

Education

2019/09 – 2023/06 **Bachelor of Software Engineering**
Dnipro, Ukraine *Oles Honchar Dnipro National University*

Skills

General

● ● ● ● ●

Algorithms, Data Structures, OOP, C++

Back-end and Databases

● ● ● ● ●

NodeJs, Express, SQL, MongoDB, MySQL

Tools and other

● ● ● ● ●

Git, GitHub, Visual Studio Code, Postman,
MongoDB Atlas, Netlify, Railway

Front-end

● ● ● ● ●

JavaScript, HTML, CSS, React, Redux toolkit,
Bootstrap, SASS, MaterialUI, FramerMotion

Testing

● ● ● ● ●

Mocha, Chai

Additional Skills/Technologies

● ● ● ● ●

Socket.IO, Nodemailer, JWT

Languages

Ukrainian

Native

English

Upper-Intermediate

Projects

Code-Network

A web-application that enables the creation, execution, and storage of code files while supporting real-time editing by multiple users. A fully functioning code editor with features such as syntax highlighting, compilation error detection, and syntax hints. Additional functionality includes discussions, comments, user pages, building network by following users, and safe JWT authentication. Only authorized users can access certain features and make protected requests, ensuring the safety of user data and interactions.

• Features:

- Code editor, Collaboratory, Projects, Discussions, Comments, Settings, Userpage, Followers, Security

• Stack:

- MongoDB, Express, React, Bootstrap, Redux, NodeJS, Socket.IO, JDoodle, CodeMirror, Quill

Movies App

A website made using **MERN stack, Nodemailer and Bootstrap** where users can add movies, search them, filter, rate, comment, and save to their watchlists

My portfolio site

Developing this site I practiced core **CSS and React**, making it bright and interactive
