SKILLS

- Front end: JavaScript, TypeScript, ReactJS, Bootstrap, Sass, HTML, CSS

- Backend: NodeJS, Express, NodeMailer, JWT, PHP

- Database: MongoDB, MySQL, MSSQLServer

- Tools: VSCode, Postman, MongoDB Atlas, Netlify, Git/GitHub/GitLab

- Desktop: C#, C++, SFML, Raylib

- Machine learning: Python, Numpy, Keras, Pandas, TensorFlow

- Numerical: Algorithms, Higher mathematics, Statistics, Mathematical analysis, Empirical methods

LANGUAGES

- English | Intermediate

- Ukrainian | Native

OBJECTIVE

As a graduate student in software engineering and self-taught web developer with expertise in HTML, CSS, JavaScript, and TypeScript, as well as experience working with MERN stack, I am eager to apply my skills and 1 year of experience working on personal projects to make meaningful contributions to complex projects. I am particularly excited to learn from experienced developers and build more sophisticated applications in the context of real-world, commercial projects

EXPERIENCE

FULL STACK DEVELOPER

Pet Projects Web Applications. Dnipro | Jul 2022 - Apr 2023

- Designed and implemented web applications such as movies sites and tools for online code editing for users with collaborative mode
- Developed fully responsive web pages for optimal user UX

- Worked with ReactJS, NodeJS, MongoDB, MySQL, JWT for safe and reliable back-end

EDUCATION

SOFTWARE ENGINEERING BACHELOR

Oles Honchar Dnipro National University. Dnipro, Ukraine | 2019 - Present

Studied basics of programming languages, mathematics, OOP, algorithms and data structures, automated testing, project management, security of web applications, basics of UI/UX, machine learning, databases and architecture of software

PROJECTS

Movies App - MERN web site for users to create and share lists of movies, rate and comment movies. ToDo - front end of a web site for tracking and palnning regular activities. Organic - front end of a food market. COESite - online code editor with collaboration mode (full stack web site)
